Chapter-4 > Theory of the firm

Market: (বাজার): Market is a condition where buyers and sellers come together and interact to buy and sell goods or service.

Types of market structure: Based on 3 criteria:

i) Number of buyers and sellers

ii) Types of products

iii) Entry and Exit of firm.

4 types of market structure:

i) Perfect competition > পূর্ণপ্রতিযোগিতামূলক বাজার

ii) Monopolistic " > একচেটিয়া প্রতিযোগিতা

iii) Oligopoly " > অলিগোপলি

iv) Monopoly " > একচেটিয়া বাজার

Overview:

Criteria	Market Structures			
	Perfect Competition	Monopolistic Competition	Oligopoly Competition	Monopoly competition
Number of buyers and sellers	Many/Unlimited	Many	few	one
Types of Producds	Homogeneous	Non-Homoge--neous	Non-Homogene--ous	Unique
Entry and Exit of firm	High	High	Low	Block
Examples	Agriculture/ Product	Clothing Brand	Software Companies	Rajshahi WASA (RWASA)

Lecture-2

08.10.2026

Revenue (রাজস্ব): Revenue is the total amount of money a producer or seller or firm earns from selling has/her goods or services.

Total Revenue (TR) = Q × P → per unit price

↓ total quantity

for example: $Q = 10$ kg tea

$P = 60$ tk

$\therefore TR = (10 \times 60)$

$= 600$

Average Revenue (AR) – গড় আয়

AR is total revenue (TR) divided by total quantity of goods or services.

$$AR = \frac{TR}{Q}$$

Marginal Revenue (MR) – প্রান্তিক আয়

MR is defined as the change in total revenue (TR) divided by change in quantity of goods or services (Q).

$$\therefore MR = \frac{\Delta TR}{\Delta Q}$$

Revenue of a firm or producer in a perfect competitive market.

→

Quantity (Q)	Price Per Unit (P)	$TR = Q \times P$	$AR = \frac{TR}{Q}$	$MR = \frac{\Delta TR}{\Delta Q}$
0	4	∞	∞	∞
1	4	4	4	4
2	4	8	4	4
3	4	12	4	4
4	4	16	4	4
5	4	20	4	4
6	4	24	4	4
7	4	28	4	4
8	4	32	4	4
9	4	36	4	4
10	4	40	4	4
